

Introducing DRYRAX™ Boat Storage

Custom Engineered

DryRax™ can be custom engineered and manufactured to meet your specific requirements and all units come with adjustable shelving to accommodate future changes in boat storage requirements. DryRax™ can be purchased as single or multiple bays. Additional Bays can be added at any time. DryRax™ can be designed to be free standing, covered or fully enclosed

DryRax™ systems are engineered and manufactured to meet all current legislation regarding health and safety (PSHSR regulations), Provincial and Federal building codes regarding environmental loading.

For more Information on the benefits of Dry Rack Storage call toll free at 1-800-663-1624

DryRax™ provide an excellent opportunity to provide service to boating clientele during both the summer and winter months.

DryRax™ systems are well suited to marinas that are short on dock space and are moving towards "valet service", marina operators that have installed this service are finding their boating clients prefer it over standard dockage. In addition to protecting the boat against environmental hazards, boats are secure.

Options to Choose From

Covered or uncovered, DryRax™ systems provide a cost effective way of providing winter storage especially where marina real estate is at a premium. For many marina operators, DryRax™ storage systems provide added revenue year round.

Quality Manufacturing and Installation

WMW DryRax™ systems are made from prefabricated hot rolled steel and can be painted or galvanized. Once custom design and manufacturing is complete, systems can be shipped directly to your site for quick and easy assembly by either WMW personnel or by a designated contractor. Once installed, they are virtually maintenance free.
